

Muhammad Anas Naeem

DevOps Engineer

✉ anasnaem240@gmail.com ☎ +92-324-2009744 📍 Karachi, Pakistan

🌐 [Portfolio](#) 🔗 [LinkedIn](#) 🐙 [GitHub](#)

Professional Summary

DevOps Engineer with hands-on experience in CI/CD pipeline automation, cloud infrastructure provisioning, containerization, and monitoring. Skilled in AWS, Docker, Kubernetes, Jenkins, Terraform, and Linux with strong understanding of Infrastructure as Code (IaC), cloud-native deployment, microservices architecture, and system reliability practices. Passionate about building scalable, automated, and secure cloud environments.

Professional Experience

303 Inc. **Mar 2025 – Present**
DevOps Engineer

- Designed and deployed Jenkins CI/CD pipelines, reducing deployment time from 3 hours to 25 minutes (86% reduction).
- Migrated 5+ on-premise applications to AWS EKS, achieving 40% cost savings and improved scalability.
- Provisioned infrastructure with Terraform, managing 20+ AWS resources and reducing setup time by 70%.
- Implemented full-stack monitoring using Prometheus and Grafana, reducing MTTR by 50% across production systems.

AQ WebWorks **Feb 2024 – Feb 2025**
Junior DevOps Engineer

- Engineered and maintained CI/CD pipelines using Jenkins and GitHub Actions, increasing release cadence by 3x.
- Administered AWS infrastructure (EC2, S3, RDS, VPC), supporting 99.5%+ uptime across development and production environments.
- Automated infrastructure provisioning with Terraform and Ansible, reducing environment setup time from days to under 2 hours.

303 Inc. **Dec 2023 – Feb 2024**
DevOps Intern

- Collaborated with developers to streamline CI/CD pipelines, reducing build failures by 30% within the first month.
- Automated infrastructure deployments using Terraform and Ansible across 10+ staging and production environments.
- Monitored application performance and system health, identifying 3+ critical incidents before production impact.

Education

Bachelor of Science in Software Engineering Jan 2022 – Dec 2025
University of Karachi

- Built a strong foundation in Software Engineering, Linux, Computer Networks, Operating Systems, and Cloud Computing.
- Gained hands-on experience with Git, Docker, Kubernetes, CI/CD, AWS, IaC, and automation through projects.
- Applied DevOps practices including containerization, deployment automation, monitoring, and version control.

Higher Secondary Certificate (Pre-Engineering) 2019 – 2021
Govt. Degree Boys College Jauhar | Grade: A

Cambridge O Levels 2016 – 2019
The Academy School | Cambridge Assessment International Education

Technical Skills

Cloud Platforms: AWS – EC2, S3, Lambda, IAM, VPC, EKS

Containers & Orchestration: Docker, Kubernetes,

CI/CD & Version Control: Jenkins, GitHub Actions, Git, GitHub, GitLab

Infrastructure as Code: Terraform, Ansible

Programming & Scripting: Python, Bash, YAML

Operating Systems: Linux (Ubuntu), Windows Server

Key Projects

Fully Automated CI/CD Pipeline for Microservices

- Architected an end-to-end CI/CD pipeline using Jenkins, Docker, and Kubernetes with integrated security scanning (Trivy) and image vulnerability assessment.
- Enforced a blue-green deployment strategy ensuring zero-downtime releases and instant rollback capabilities.
- **Impact:** 80% faster deployments, 99.9% application availability.

AWS Serverless DevOps Platform

- Developed a serverless web application using Lambda, API Gateway, DynamoDB, and S3 with infrastructure codified in Terraform.
- Configured a CI/CD pipeline with GitHub Actions for automated testing and continuous deployment.
- **Impact:** 60% cost reduction compared to traditional EC2-based architecture.

Infrastructure as Code Automation

- Developed modular Terraform configurations for AWS infrastructure including VPC, subnets, EC2, RDS, and EKS.
- Integrated Ansible for post-provisioning configuration management and application setup.
- **Impact:** Infrastructure provisioning time reduced from 2 days to 30 minutes.

Real-Time Resource Monitoring Tool

- Built a Python-based system monitoring tool with real-time CPU, memory, and disk usage tracking.
- Containerized with Docker, deployed on Kubernetes, and visualized metrics in Grafana dashboards.
- **Impact:** Proactive alerting prevented 5+ potential production incidents.

Certifications & Training

- CI/CD with Jenkins and Docker – Udemy
- AI-Driven Infrastructure as Code (IaC) and Cloud Automation – Udemy
- Mastering Linux: The Complete Guide to Becoming a Linux Pro – Udemy
- AWS Essentials: A Complete Beginner's Guide – Udemy
- Mastering AWS Serverless: Hands-On with Core AWS Services – Udemy
- DevOps Master Class – TrainWithShubham
- Docker Mastery: with Kubernetes + Swarm – Udemy

Languages

- English (Professional Working Proficiency)
- Urdu (Native)
